Changes to Quarterly Credit Union Data Summary

For 2019Q1:

Two changes were made to the income statement tables in the Credit Union Data Summary with the release of the 2019Q1 Call Report.

- (1) A new variable, interest income on securities held in a trading account, was added to the total interest income section.

The Financial Accounting Standards Board (FASB) on Jan. 5, 2016, issued a new Accounting Standards Update (ASU), *Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*. The new standard addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. The main objective in developing this new ASU is to enhance the reporting model for financial instruments to provide users of financial statements with more useful information.

This ASU affects all reporting organizations, whether public or private, that hold financial assets or owe financial liabilities. For all nonpublic organizations, including not-for-profit organizations and employee benefit plans, the ASU is effective for fiscal years beginning after Dec. 15, 2018, and interim periods within fiscal years beginning after Dec. 15, 2019.

For additional information on this new accounting standard see:

FASB Accounting Standards Update No. 2016-1: Financial Instruments – Overall (Subtopic 825-10), Recognition and Measurement of Financial Assets and Financial Liabilities, January 2016 https://www.fasb.org/jsp/FASB/Document_C/DocumentPage?cid=1176167762170&acceptedDisclaimer=true

- (2) The provision for loan and lease losses variable was expanded to include credit loss expense and is now called provision for loan and lease losses or credit loss expense.

This change stems from a new accounting standard issued by the Financial Accounting Standards Board (FASB), Accounting Standards Update (ASU) No. 2016-13, Topic 326, *Financial Instruments – Credit Losses*, on June 16, 2016. The new accounting standard introduces the current expected credit losses methodology (CECL) for estimating allowances for credit losses. The new standard applies to all banks, savings associations, credit unions, and financial institution holding companies (hereafter, institutions), regardless of size, that file regulatory reports for which the reporting requirements conform to U.S. generally accepted accounting principles (GAAP).

By issuing CECL, the FASB:

- Removed the “probable” threshold and the “incurred” notion as triggers for credit loss recognition and instead adopted a standard that states that financial instruments carried at amortized cost should reflect the net amount expected to be collected.
- Broadened the range of data that is incorporated into the measurement of credit losses to include forward-looking information, such as reasonable and supportable forecasts, in assessing the collectability of financial assets.
- Introduced a single measurement objective for all financial assets carried at amortized cost.

Effective date for credit unions: For an entity that is not a Public Business Entity (non-PBE), the credit losses standard is effective for fiscal years beginning after Dec. 15, 2021, including interim periods within those fiscal years. Thus, for a non-PBE with a calendar year fiscal year, the standard is effective Jan. 1, 2022, and the entity must first apply the new accounting standard in its financial statements and regulatory reports

(e.g., the Call Report) for the quarter ended March 31, 2022. However, the new CECL standard allows for early adoption as of Jan. 1, 2019.

Previous Changes:

Starting with the quarter ending Sept. 30, 2018, data available from the Call Report began to reflect changes made necessary by the member business loan rule that took effect in January 2018. The change was part of NCUA's Regulatory Modernization Initiative.

The NCUA Board amended the MBL rule to give federally insured credit unions greater flexibility and individual autonomy to safely and soundly provide commercial and business loans to serve their members. The revised rule replaced prescriptive requirements and limitations—such as collateral and security requirements, equity requirements, and loan limits—with a broad principles-based regulatory approach. One immediate result was the elimination of the MBL waiver process, which is no longer needed under a principles-based rule.

The new rule required changes to the member business accounts in the Call Report. Starting with the 2018Q3 Call Report, almost all MBL accounts were deleted and replaced with new commercial loan accounts. A commercial loan is defined as:

Any loan, line of credit, or letter of credit (including any unfunded commitments), and any interest a credit union obtains in such loans made by another lender, to individuals, sole proprietorships, partnerships, corporations, or other business enterprises for commercial, industrial, agricultural, or professional purposes, but not for personal expenditure purposes.¹

Some loans that might otherwise be classified as commercial—not for personal expenditure purposes—are not included in the commercial loans definition. These are:

- Loans made by a corporate credit union;
- Loans made by a federally insured credit union to another federally insured credit union;
- Loans made by a federally insured credit union to a credit union service organization;
- Loans secured by a 1- to 4-family residential property whether or not it is the borrower's primary residence (securing greater than 50 percent of the principal amount of the loan at origination);
- Loans fully secured by shares in the credit union making the extension of credit or deposits in other financial institutions;
- Loans secured by a vehicle manufactured for household use; and
- Loans that would otherwise meet the definition of commercial loan and which, when the aggregate outstanding balances plus unfunded commitments less any portion secured by shares in the credit union to a borrower or an associated borrower, are equal to less than \$50,000.

¹ See NCUA Rules and Regulations 723.2 for a complete definition.

In Call Reports prior to the Sept. 30, 2018 version, member business loans (acct_400T) included member (acct_400A) and non-member (acct_400B) business loans plus unfunded commitments. The Call Report continues to collect selected MBL-related accounts, which are necessary to comply with the Federal Credit Union Act. Account 400A was specifically carried over to capture total MBLs for measuring against the statutory cap. Beginning with the Sept. 30, 2018 Call Report, account 400A is labeled “Total member business loans—Net member business loan balance (NMBLB).”² (Refer to NCUA 5300 Call Report instructions for information on other MBL-related accounts.)

Section 105 of the Economic Growth, Regulatory Relief, and Consumer Protection Act (S.2155) amended the statutory member business loan limit to exempt all loans secured by a 1- to 4-family dwelling (residential property) from the definition of a member business loan. Previously, only loans secured by a 1- to 4-family dwelling that is the member’s primary residence were excluded. This change was reflected in the NCUA’s Rules and Regulations through a NCUA Board notation vote on May 30, 2019 and took effect with the 2019Q2 Call Report. Beginning in 2019Q2, the revised definition of a member business loan in account 400A should not include any loans secured by a 1- to 4-family residential property. For additional information on this change and other changes in S.2155 applicable to credit unions see: <https://www.ncua.gov/newsroom/Pages/ncua-report/2019/third-quarter/frequently-asked-questions-impact-s2155-credit-unions.aspx>

While there are conceptual similarities between MBLs and commercial loans, because they are defined differently, it is inappropriate to directly compare previous MBL accounts with new commercial loan accounts. In 2018Q3 and 2018Q1, the Quarterly Credit Union Data Summary reflected this by showing MBL and commercial loan data separately. Beginning in 2019Q1, the Quarterly Credit Union Data Summary displays only commercial loans.

The changes described above primarily affect the loan section of the balance sheet tables in the Quarterly Credit Union Data Summary, beginning with the release of the 2018Q3 data:

- Commercial loans, year-to-date, at an annual rate and the commercial loan delinquency rate appear in the Summary Credit Union Data table on page one. Commercial loans, excluding unfunded commitments, are included in the loan section of the Balance Sheet on pages four and five. Each of these data series begins in 2018Q3; data before 2018Q3 are not available.
- Historical data on member business loans and the member business loan delinquency rate are also included in these tables. For all MBL variables, the final quarter of data is 2018Q2. Starting in 2019Q1, MBLs are no longer included in the loan section of the balance sheet, though the MBL account required for statutory purposes does appear in a separate Addenda item on the balance sheet tables to allow for historical comparisons.
- Due to changes to the Call Report resulting from the new MBL rule, a new variable, long-term assets, percent of assets, has replaced net long-term assets, percent of assets. Long-term assets represents the sum of real estate fixed-rate first mortgages and investments greater than three years.

With the release of the 2019Q1 Call Report, three new real estate loan variables have been added to the loan section of the balance sheet tables in the Quarterly Credit Union Data Summary.

- These new variables are loans secured by 1- to 4-family residential properties, loans secured by 1- to 4-family residential properties secured by first lien, and loans secured by 1- to 4-family residential properties secured by junior lien.
- Two new commercial loan variables have been added to the loan section of the balance sheet: commercial loans secured by real estate and commercial loans not secured by real estate.
- Real estate loans and real estate fixed-rate, first-mortgage loans have been replaced by the three new real estate loan variables described above. These two accounts are still shown as separate Addenda items at the bottom of the balance sheet tables to allow for historical comparisons.
- Net member business loan balance for regulatory reporting, Part 723 (account 400A), is also reported as a separate Addenda item. This series extends back to 2004Q1.

² See NCUA Rules and Regulations, 723.8 for a more complete discussion of what constitutes a member business loan for account 400A.

For additional information on these new loan categories, see NCUA 5300 Call Report Instructions, effective Sept. 30, 2018, at <https://www.ncua.gov/regulation-supervision/Pages/documents/call-report-instructions-9302018.pdf>.
